SOP-014 Cold-Chain Storage v2 - Page 1

Section 1. Purpose and Scope: This standard operating procedure defines storage protocols for cold-chain biological products at Novacure Labs facilities.

Vaccine batches must be stored at 2 to 8 °C.

Storage units are monitored continuously using calibrated temperature probes. Arjun Menon manages the warehouse temperature monitoring logging system.

Section 2. Temperature Excursion Management:

Temperature excursions of up to 12 hours do not require a deviation report.

Warehouse staff shall log minor excursions in the auxiliary shift log without initiating immediate quarantine.
