SOP-021 CAPA Management

Document ID: SOP-021 | **Version:** v1.0 | **Effective Date:** 2025-03-10 | **Author:** Priya Rao

1. Purpose

This procedure defines the requirements for initiating, evaluating, executing, and tracking Corrective and Preventive Actions (CAPA) at Novacure Labs.

2. Scope

Encompasses quality issues resulting from confirmed OOS analytical findings, repeated deviations, internal audit findings, and regulatory audit observations.

3. Responsibilities

Priya Rao, QA Lead, owns deviation management and provides oversight for CAPA system governance. Dr. Meera Iyer, QA Head, holds final approval authority for CAPA closure.

4. Timelines and Investigation

A CAPA must be raised and the investigation completed within 15 working days of an OOS result being confirmed. The root-cause investigation must document verifiable containment and systemic remediation actions.

5. Effectiveness Review

Each CAPA action plan must specify an effectiveness verification milestone typically scheduled 60 to 90 days post-implementation to guarantee defect recurrence is eliminated.
